IEC Centra CL2

General-purpose benchtop centrifuge

Features

- Broad library of swinging bucket and fixed angle rotors and adapters
- Impressive range of speeds – up to 4,770 x g
- Small footprint requires minimal bench space
- Lightweight and easy to transport
- Sealed Aerocarrier™ adapters ensure biocontainment
- High capacity – Spin up to 28 x 5/7 mL (13 mm) blood tubes and 8 x 50 mL conicals
- User-friendly controls allow rapid time and speed adjustments
- Microprocessor-based controls ensure consistent, accurate results

Flexibility for general-purpose applications

- The IEC Centra CL2 has a range of swinging bucket and fixed angle rotors, all with an extensive series of adapters. With its broad library of accessories, the CL2 can support a wide range of applications.
- The IEC Centra CL2 can run samples at up to 4,770 x g, providing you with the separating ability you need for a range of general purpose applications.

Convenient size

- With its small footprint of only 27 cm x 34 cm (13" x 16"), the IEC Centra CL2 occupies considerably less bench space than comparable centrifuges.
- Weighing just 13 kg (29 lbs) packed, the IEC Centra CL2 makes it very easy to move the unit around your lab, or for use in field work and other applications where you may need to transport the unit frequently.

Safety and Productivity

- The convenient, lightweight Aerocarrier adapters allow samples to be removed

from the rotor and sealed and unsealed in a biosafety cabinet with screw-tight lids that can be easily manipulated with gloved hands. The adapters can be cleaned with most common disinfectants and autoclaved without risk of corrosion.

- The IEC Centra CL2 can hold up to 28 x 5/7 mL (13 mm) blood tubes and 8 x 50 mL conicals (in the 52152 rotor system). This allows you to accommodate larger batch sizes without compromising on bench space.

Powerful, intuitive interface

- The IEC Centra CL2's interface is simple to learn. Time and speed are easily adjusted with up / down keys, which can be easily pressed with gloved hands.
- The unit's microprocessor-based controls ensure accurate results.
- The IEC Centra CL2's At-Start timer, which only starts the timer once the rotor reaches its maximum speed, allows you to achieve consistent results from run-to-run, regardless of differences in rotor loading, which can result in differing acceleration / deceleration rates.
